PROFESSIONAL PROFILE

Highly accomplished researcher with a PhD in Computer Science, specializing in Deep Learning, Machine Learning, and Information Security. Graduated with distinction from the University of Electronic Science and Technology of China, recognized with the Academic Performance Award and **Outstanding Graduate** title. Led national research projects, including the 2019 National Natural Science Foundation Fund Project on IoT Malware Identification. Awarded the **Blockchain-Based Secure Data Sharing Project** (2019), and contributed to groundbreaking work in federated blockchains for **PET-CT imaging** at Huzhou City Hospital (2023). Published over **70 papers** in top-tier journals and conferences, with recognition from IEEE Sensors Journal for COVID-19 detection using CT imaging. Successfully secured multiple research grants from government and university-level projects (2019, 2024).

RESEARCH INTERESTS

Specialized in Network Security, Deep Learning, Large Language Models, Computer Vision, and Blockchain Technology. My research is focused on developing innovative solutions to address critical challenges in cybersecurity and data privacy. With a deep commitment to advancing AI-powered systems, I work on scalable, secure technologies that have real-world applications, including IoT malware detection, federated learning for healthcare, and blockchain-based secure data sharing. My goal is to drive innovation in these fields, contributing to the future of AI-driven security solutions.

Teaching Experience

Associate Researcher/Teaching Fallow Huzhou UESTC (2021 to Current):

- ✓ Courses Taught: <u>Java</u>, <u>Database</u>, Data structure, C++, <u>Deep Learning</u>, <u>Research Methodology</u>, Machine Learning and Blockchain.
- ✓ Supervise **Master's students** in research projects and thesis work.
- ✓ Developed and delivered **lectures**, **tutorials**, **labs**, and **coursework** for undergraduate and graduate courses.
- ✓ Contributed to research in Computer Vision projects, publishing papers and securing funding.

AIMS IT ACEDEMY (2014-2016):

✓ Delivered courses in <u>Java Programming</u>, <u>PhP Web Programing</u>., <u>Android Development</u>, <u>Database</u> Design, and Data Structures.

- ✓ Designed hands-on **programming exercises**, enhancing student engagement and practical learning.
- ✓ Mentored students on **industry practices** and real-world application, fostering career readiness and skill development.

Associate Researcher/Teaching Fallow

(July 2021- Current)

YANGZI DELTA RIVER RESEACH INSTITUTE OF HUZHOU, UNIVERSITY OF ELECTRONICS SCIENCE AND TECHNOLOGY OF CHINA

Research Responsibilities:

- ✓ Lead research projects in Blockchain, Deep Learning, and Computer Vision.
- ✓ Published multiple papers in international journals and conferences.
- ✓ Secured funding for blockchain-based collaborative learning systems in healthcare.
- ✓ Supervised a research team for **PET-CT imaging analysis** using federated blockchain technology.
- ✓ Developed new datasets and tools for network security and AI.

Teaching Responsibilities:

- ✓ Taught undergraduate and graduate courses including Java, Data Structures, C++, Machine Learning, Blockchain, and Research Methodology.
- ✓ Created and updated course materials aligned with industry trends.
- ✓ Supervised **Master's students** in their research projects and theses.
- ✓ Organized seminars and workshops on emerging technologies like federated learning and secure data sharing.
- ✓ Contributed to **curriculum development** for Al-related courses.

Postdoctoral Fellow

(June 2019- June 2021)

UNIVERSITY OF ELECTRONICS SCIENCE AND TECHNOLOGY OF CHINA

Advisor: Dr. Wang Wenyong

- ✓ Worked on national projects, including IoT Malware Detection and Blockchain-based Secure Data Sharing
- ✓ Collected and processed large datasets for research, resulting in the publication of two papers in reputed journals
- ✓ Assisted in the development and design of research methodologies for AI-driven security systems.

Software and Web Application Developer (Internship)

(June 2014 - June 2015)

University of Sindh, Jamshoro, Pakistan

- ✓ Developed web applications and internal software solutions for university management.
- ✓ Implemented features in the examination results and admission management systems, improving functionality and user experience.

EDUCATION

UNIVERSITY OF ELECTRONICS SCIENCE AND TECHNOLOGY OF CHINA

(2016-2019)

- PHD (Doctor of Engineering in Computer Science and Technology) (English Instruction Program) Thesis Topic: Android Malware Detection based on Machine Learning.
- ✓ Developed a novel machine learning framework to detect and classify Android malware with improved accuracy, leading to the publication of multiple papers in IEEE and ACM journals: (Papers: Link1, Link2, Link3, Link4, Link5).
- ✓ Collaborated with industry partners on creating secure data-sharing protocols for IoT devices, contributing to the National Natural Science Foundation of China (NSFC) funded project.
- ✓ Contributed to national research projects focused on network security and AI-based malware **detection**, which earned recognition for their impact on **cybersecurity**.

UNIVERSITY OF SINDH, JAMSHORO

(2014-2016)

MS (Computer Science)

- ✓ Conducted research on network security and database management systems, producing a thesis on secure fees payment system in distributed environments.
- ✓ Participated in university-industry collaboration projects related to web application security and data encryption.

UNIVERSITY OF SINDH, JAMSHORO

(2010-2013)

BS (Computer Science)

- ✓ Specialized in **software engineering** and **database systems**, developing a final project on **automated attendance systems** using Android technology.
- ✓ Awarded for academic excellence in **programming languages** and **system design** courses.

Dataset Creation Experience

- ✓ Create new dataset for the Grass Cutting Robot (Private Project: Link1, YouTube Video).
- ✓ Combine 6 opensource dataset and generate new dataset for Auto driving Ship Navigation.
- ✓ Build a dataset for Natural Language Processing (Sindhi named entity recognition) [published paper: Link1].
- ✓ Collect Dataset form 8 Hospital of COVID-19 lung detection. [published paper Link 1, Link 2, YouTube Video].

SKILLS

Technical Skills:

- ✓ Unique & In-Demand Skills: Blockchain technology, Federated Learning, Deep Learning Models, Network Security, Machine Learning.
- ✓ Programming Languages: Java, C/C++, Python, Android, DotNet, PHP
- ✓ Database Management: MySQL, Database Design, Enterprise Database Management
- ✓ Tools & Software: Visual Studio, Microsoft Office, Adobe Photoshop

Leadership & Management Skills:

- ✓ Supervised Master's students in National Science Foundation of China (NSFC) funded projects.
- ✓ Led a data-sharing security team in the Kaggle competition, focusing on secure data protocols.
- ✓ Organized weekly training sessions and team-based challenges to enhance team collaboration.
- ✓ Delivered **presentations** and challenge solutions, driving innovation in project development.

Project Advising & Collaboration:

- ✓ Guided students on creating a Binary Analysis Tool for identifying variable types in binary programs.
- ✓ Collaborated on research to detect **privacy leaks** through existing Android frameworks, contributing to academic publications.

Python Development:

- ✓ Blockchain based federated learning model for secure data sharing (Code): Developed a federated learning model to securely share sensitive data across distributed environments. This model enhanced data privacy and received industry recognition for its innovative blockchain integration.
- ✓ Federated learning for medical images (Code): Implemented federated learning techniques to improve medical image analysis, leading to better diagnostic accuracy for healthcare institutions.
- ✓ Design a federated learning model for secure data sharing (Code).
- ✓ Android malware detection (Code): Designed a machine learning model to detect and prevent malware attacks on Android systems, significantly reducing security breaches.
- ✓ Cancer detection (Code): Developed a deep learning model to detect cancerous cells in medical imaging, contributing to early diagnosis and improved patient outcomes.

Web Development:

- ✓ University of Sindh Examination and Admission Systems:(Code) (Website), : Built and optimized the university's examination results and admission portals, improving user experience and handling large volumes of data efficiently. (Code) (Website).
- ✓ **Book Board Website:** Developed a content management system for the Sindh Textbook Board, enhancing accessibility for educational resources. (Website).
- ✓ Time Table Management System: Created a dynamic time-table scheduling system for university departments, streamlining academic scheduling and administrative processes. (Website).
- ✓ School Management System: Designed and implemented a comprehensive management system for a private school, automating administration and student data management.

Android Development:

- ✓ SMS and Call Tracking System: Developed an Android app for tracking calls and SMS, enhancing user safety and monitoring. (Code).
- ✓ Online Banking System: Created a secure mobile banking application with real-time transaction tracking and multi-factor authentication. (Code).
- ✓ **Result Information System via SMS:** Built a system allowing users to access university results via SMS, increasing accessibility for students in rural areas.
- Excel SMS Sender (Bulk SMS Sender): Developed a tool to send bulk SMS from Excel, improving communication capabilities for businesses.
- ✓ Puzzle Game & Annoying Alarm System: Designed interactive games and alarm systems, demonstrating creativity in mobile app development. (Code).

Java Development

- RFID-Based Attendance Management System: Developed an automated attendance tracking system using RFID, significantly reducing manual attendance errors
- ✓ School Management System: Built a school management system for The Guardian School, improving operational efficiency. (Code)
- ✓ Laboratory Management System: Created a custom lab management system for Advance Lab Hyderabad, automating equipment tracking and report generation. (Code)

.Net Development

✓ Hospital Management System: Developed an end-to-end solution for hospital administration, streamlining patient management and medical record-keeping.

✓ **Shop Management System:** Built a system to manage inventory, sales, and billing for retail shops.

Arduino Development

✓ Factory Control Using Ethernet (Internet Technology): Implemented an IoT-based control system for factory automation, reducing manual labor and increasing production efficiency.

Note: All projects source code available this link: https://github.com/raja21068/

PROFESSIONAL ACTIVITIES

Journal External Reviewer:

- ✓ IEEE Transactions on Information Forensics and Security.
- ✓ IEEE Internet of Things.
- ✓ Elsevier Computers & Security.
- ✓ IEEE ACCESS.

Conference External Reviewer:

- ✓ The 14th International Computer Conference on Wavelet Active Media Technology and Information Processing.
- ✓ The 15th International Computer Conference on Wavelet Active Media Technology and Information Processing.
- ✓ 2st Workshop on Cloud Security and Privacy.

TALKS

- ✓ **Key Note Speaker**: Challenges and Implications of blockchain with federated learning, "in Gundong 2019".
- ✓ **Presenter:** Malicious Code Detection: Image Processing Using Deep Learning: International Conference on Computing and Artificial Intelligence (ICAAI), Chengdu, China, March 2018.
- ✓ **Presenter:** Artificial Intelligence challenges and implantation to the current trends, AI Seminar in UESTC, 2019.
- ✓ **Presenter:** Latex and other research tools: Invited talk at Sichuan University.

PROJECTS

S#	Project Name	Date	Project Number	Project Source
1	Research on Blockchain Sharding Consensus	2019/07 2021/07	Y030190236010 16201	China Postdoctoral Science Foundation
